Antler Entry Gate by Horns-A-Plenty Antler Art

[Enlarge](#) GA900 [Details](#)

If you are looking for an entry gate that will have all the traffic stopping to take pictures, we have the gate for you. This is the gate we built for our property in the mountains of eastern Nevada. It includes two 12-volt antler chandeliers on the end pieces. You supply the concrete footers, steel structural frame, 120-volt electrical source, and cattle guard. We'll transport the antlers to your site, wrap the frame with antlers and wire the 12-volt chandeliers. The antlers will be a mixture of [Grade 2 and Grade 3 quality](#).

You are responsible for obtaining a local building permit including any required engineering/blueprints, etc. You will also need to hire a licensed local contractor and any required laborer(s) to install the concrete pillars and erect the steel framework.

We'd be happy to build a gate just like this for you or to design a custom antler gate with your preferences. It will be constructed on location by antler artist Pat Fillman. Travel is included in the price. Please call him at 1-800-467-6599 to discuss the details.
