**The ** indicates that the option cannot be ordered after the lift has been built. It must be factory installed. NO EXCEPTIONS!

The revolutionary safe way to clean and service your chandelier. Now you can clean and service chandeliers with the turn of a key. You'll never have to climb a ladder or call in extra help just to replace a light bulb. This economical electronic system enables you to lower a chandelier in less than two minutes for cleaning or service; then raise it back into place quickly, conveniently and safely to protect the value of your treasured possession.

- Safety is a major feature designed and built into Light-Lift. Child resistant safety key.
- A secure, wall-mounted, key-operated safety switch prevents tampering.
- Steel cable which supports the chandelier has a minimum tensile strength of 2000 lbs.
- Motor has thermal overload protection.
- Light Lift operates using two predetermined settings.
- 1. One position is preset by the installer to stop the lift at a precise point below the ceiling level to prevent damage to your chandelier and ceiling.
- 2. The second is a lowered position selected by the installer, based on the height of the ceiling to prevent breakage.
- At any point between these predetermined stop points, your chandelier may be effortlessly stopped with the turn of a key while it is being raised or lowered. The chandelier will glide smoothly within minutes - without sudden jumps!
- For new homes, Light-Lift is easily built-in when the chandelier is initially put into place. No scaffolding or ladders are required. You can add value to an existing home with a product that's easily installed. Existing wiring will ordinarily meet all requirements to make this guidance system operational.
- Light-Lift is engineered for quality performance. UL and cUL Listed. Patented. Limited one-year warranty on all components.
- Lowered or raised in less than two minutes.
- Designed to fit most two-story foyers or rooms.
- Does not require separate power supply; utilizes power from chandelier.
- Components hidden from view.
